"The challenge we face is that we are big enough to need a network with specific functionality & working efficiency with top of the line security. Wide Infotech provided the perfect solution with their wide range of services that meets our IT needs and problems, as they provide Web Solutions, Mobile Solutions, Product solutions and other Services like data backups & recovery and annual maintenance services. In a nut shell, they have the technical expertise and mindshare we needed, coupled with flexibility in the level of support. Wide Infotech has a very professional team and have found their staff to be very courteous, friendly and easy to work with; which is very important for a company like us having 700 people within the group. They are really responsive, understand which issues to prioritize and appreciate their detailed follow-up and preventive maintenance, that has helped us avoid major problem with our network a couple of times. A lot of companies these days make claims about customer service and looking out for the best interest of their clients, but Wide Infotech can be trusted to do what they say; and that too for a competitive price. We have been utilizing their services for 25+ years now and I look forward to the next couple of decades of this trusted alliance"

- Prashant Popat, Director, Velji Dosabhai & Sons Pvt. Ltd.
